

PLANNING YOUR LIBRARY | POST-COVID

WHAT will patrons expect after the pandemic?

WHERE should library leaders focus change for post-pandemic renovations?

HOW will two years of isolation change how people interact with space?

WHEN should libraries retain extra services from the pandemic?

WHY will designed flexibility help libraries adapt?

This workshop is a **hands-on** exploration of library space design in a new era. Please bring floorplans for your current library as you will have the opportunity to work on them in exercises throughout the day. Attendees will work in teams and may partner with other attendees from the same library to focus on critical issues or work with attendees from other libraries to gain broader exposure.

Please join NYU Professor and author of “Library Space Planning: A PLA Guide” David Vinjamuri and award-winning architects Joe Huberty and Gil Entzminger for this day of insights and training.
